EXECUTIVE SUMMARY

Enterprise transformation and AI operations executive with 20+ years designing operating models and leading the programs that modernize them across insurance, financial services, and SaaS. Owned an \$8.6M transformation portfolio at Verisk, led a 326-branch modernization at First Citizens Bank, and now builds and runs an AI agent delivery operation at Salterra Enterprises with guardrails and human approval gates. Translates executive strategy into governed, measurable execution.

\$8.6M Portfolio | \$5B+ Assets Supported | 30-40% Cycle-Time Reduction | 15%+ YoY Growth | SOC 1/SOC 2 Ahead of Schedule

SIGNATURE STRENGTHS

Operating Model Design

Redesigned delivery and governance models under live pressure at Verisk, First Citizens Bank, and Webster Bank, then led the teams that executed them.

AI-Enabled Operations

Runs production AI operations, not demos: an 8-agent development team on Claude Code with human approval gates, reusable guardrails, escalation to named people, and monitoring, measured from logs, including the failures.

Full-Stack Delivery Credibility

Has held nearly every delivery seat, from developer and analyst to program manager and portfolio director, so strategy stays grounded in execution.

CORE CAPABILITIES

Transformation: Enterprise Transformation • Operating Model Design • Digital Transformation • Organizational Design • Change Management

Portfolio & Delivery: Portfolio Governance • Program Management • PMO Leadership • Agile at Scale (SAFe, Scrum, Kanban) • P&L to \$8.6M

AI & Automation: AI-Enabled Operations • AI Agent Orchestration • AI Guardrails & Approval Gates • Workflow Automation • Claude Code • Jira

Governance & Leadership: SOC 1 / SOC 2 • Risk & Controls • AWS Cloud • Executive Advisory • Stakeholder Management

PROFESSIONAL EXPERIENCE

Salterra Enterprises, LLC | *Head of IT & AI Transformation* | Remote May 2026 to Present

- Designed and deployed an 8-agent AI development team on Claude Code covering build, QA, SEO/AEO, CRM, reporting, onboarding, and infrastructure, with shared guardrails encoded as reusable skills.
- Run the team as a delivery operation: analysts write Jira cards, specialized agents execute them, and a QA agent advances each to user testing. From Aug 1 to Oct 1, 2026 the team resolved 355 cards; the 252 routed to the agents closed in a median of 8.4 hours versus 44.6 for the rest. Automated pickup with code verification is in pilot.
- Built an AI support agent in Slack with rate limits, timeouts, and escalation alerts: all 41 unattended runs completed, 99 of 122 inbound messages got signed in-thread replies, and five early defects were fixed within two days.
- Integrated GoHighLevel CRM with AI through OAuth and built a CRM agent under TCPA and CAN-SPAM consent rules. Its guard blocks deletes and campaign scheduling outside dry runs, refuses SMS, and fails closed on unknown operations, with 23 tests.
- Built nightly visual QA across 17 device and orientation combinations (0.3% pixel-diff threshold). After a silent failure, added a watchdog that caught a stopped run in under six minutes on Sep 27.
- Migrated project tracking from spreadsheets to Jira with a shared workflow scheme for client site builds. Led the migration of a web agency's client build pipeline from static HTML/Vercel to Framer and cut client onboarding to a two-click scaffold generator.

Verisk Analytics | *Director, Enterprise Transformation & Strategy, Life Solutions Platform* | Remote Oct 2023 to Jul 2025

- Owned an \$8.6M multi-year transformation portfolio supporting \$5B+ in managed assets across Verisk's Life Solutions SaaS platform for life insurance carriers, reporting directly to executive stakeholders on delivery, financial, and client-impact performance.
- Cut release and upgrade cycle times by 30-40% by redesigning the enterprise delivery operating model around SAFe and Kanban, ending chronic delays that had eroded client and stakeholder confidence for years.
- Drove 15%+ YoY revenue growth by redesigning enterprise processes, strengthening portfolio governance, and reallocating investment toward the highest-ROI client-impact initiatives.
- Stood up standardized portfolio management practices, forecasting frameworks, delivery dashboards, and financial visibility tools that gave executives clean insight into program performance for the first time.

The Jahnel Group | *Principal Consultant, Business & Technology Transformation* | Remote Jul 2021 to Jul 2023

- Delivered SOC 1 and SOC 2 certifications up to six months ahead of schedule for insurance and financial services clients through disciplined delivery governance, preemptive control design, and tight cross-functional coordination.
- More than doubled loan processing throughput by redesigning end-to-end workflows, automating manual steps, and integrating AWS cloud solutions into the client's servicing stack.

First Citizens Bank | *Enterprise Transformation Lead* | Raleigh, NC May 2019 to Jul 2021

- Handpicked by executive leadership to lead enterprise teller-system modernization across 326 branches and 3,000+ employees, the highest-visibility operational transformation in the retail bank at the time.
- Delivered SOC 1 and SOC 2 certifications three months ahead of schedule, strengthening operational controls ahead of regulatory review windows.
- Increased delivery velocity and reduced rework by 30% through Agile transformation across cross-functional teams, improving predictability for executive planning and budgeting.

Webster Bank | *VP, CIO Governance Lead* | Waterbury, CT May 2017 to May 2019

- Moved into CIO governance in Sep 2018 after serving as VP, Business Relationship Management, the liaison between enterprise IT and Marketing, Bank Operations, and Human Resources through a major cloud and Agile transformation.
- Led strategy and execution for the multi-year migration to Amazon Web Services (AWS), coordinating technical and business stakeholders.

Kforce, Inc. (Client: United Technologies Corp.) | *Senior Project Manager* | Shelton, CT 2015 to May 2017

- Led data conversions and integrations from legacy HR systems into a global Workday deployment for a Fortune 50 manufacturer, coordinating HRIS, Payroll, and HRIT functions.

Apex Systems (Clients: Travelers, Wolters Kluwer) | *Senior Project Manager* | East Hartford, CT 2013 to 2015

- Travelers Personal Insurance PMO: unblocked an 18-month-stalled compliance effort and delivered a paper overhead reduction program projected at \$1.7M in annual savings.

ESPN | *Project Manager / Scrum Master, Technology PMO* | Bristol, CT 2012

- Rebuilt a struggling ad-sales automation team into a high-performing Scrum team by unifying IT and Account Executive resources under a single delivery cadence.

Travelers | *Project Manager / Project Lead / Developer / Business Analyst* | Hartford, CT 2005 to 2012

- Selected into the Travelers IT Leadership Development Program (10 to 15 accepted from 3,000+ applicants; ranked in the top 30% of the cohort), rotating through developer, BA, project lead, and PM roles on mission-critical systems.
- Led a \$4M upgrade from a 30-year-old legacy system to a modern .NET agent-appointment platform, cutting independent agent appointment time from 10 days to 1 hour and generating a multi-million-dollar revenue uplift.

EDUCATION

M.S. Information Systems, Marist College • B.S. Information Systems, Marist College • Agile Scrum Fundamentals Certification

ADDITIONAL

Named inventor on a USPTO patent application (DMV 2.0 GovTech concept) • President, Academic Nonprofit; Former President, HEAT Triathletes • 7x Ironman Triathlon Finisher, 20+ Marathons, Brazilian Jiu-Jitsu & Muay Thai
