EXECUTIVE SUMMARY

Technology and operations executive with 20+ years designing the operating models that make complex organizations run, and the enterprise transformation and AI-enabled operations that modernize them, across insurance, financial services, and SaaS environments. Career spans every role on a modern delivery team, from developer and business analyst to scrum master, project manager, program lead, principal consultant, and portfolio director, providing full-stack delivery credibility that most senior executives cannot match. Known for walking into organizational complexity, designing the operating model, and delivering measurable results: translating executive vision into executable strategy, building and leading high-performing cross-functional teams, and sustaining delivery momentum through ambiguity, budget pressure, and leadership change.

[\\$8.6M Portfolio](#) | [\\$5B+ Assets Supported](#) | [30-40% Cycle-Time Reduction](#) | [15%+ YoY Growth](#) | [SOC 1 / SOC 2 Ahead of Schedule](#)

SIGNATURE STRENGTHS

Operating Model Design

Architects how organizations actually run: structure, process, decision rights, governance, and accountability. Has redesigned operating models under live organizational pressure at Verisk, First Citizens Bank, and Webster Bank, consistently delivering measurable improvements in delivery velocity, financial performance, and client outcomes. Does not hand off a blueprint; builds and leads the team that executes it.

Full-Stack Delivery Credibility

Has held nearly every seat on a technology delivery team: developer, business analyst, scrum master, project lead, program manager, principal consultant, portfolio director. That breadth means strategy stays grounded in what execution actually costs, coaching is specific and credible, and tradeoff decisions account for the real constraints on both sides of the table.

Enterprise Transformation at Scale

Led transformation programs impacting 300+ branches, 3,000+ employees, and \$5B+ in client assets. Consistently selected by executive leadership for the highest-visibility initiatives, not because the environment was easy, but because the outcomes were non-negotiable. Delivered SOC 1 and SOC 2 certifications ahead of schedule across three consecutive engagements by catching what others had normalized.

AI-Enabled Operations

Applies operating model discipline to AI tooling, data pipelines, and intelligent workflow automation, extending the same transformation approach that has driven results across insurance, financial services, and SaaS into hourly and advisory engagements. Focused on building AI-enabled operations that produce measurable business results, not demonstrations of capability.

CORE CAPABILITIES

Strategy & Transformation: Operating Model Design • Digital Transformation • Enterprise Strategy • AI-Enabled Operations • Organizational Design • Business Process Management • Change Management

Delivery & Portfolio: Full-Stack Delivery • Portfolio & Program Leadership • Agile at Scale (SAFe, Scrum, Kanban) • P&L / Budget Management up to \$8.6M • Forecasting & Governance • Multi-Vendor & Matrixed Execution

Governance & Risk: SOC 1 / SOC 2 • Regulatory Delivery • Enterprise Architecture Alignment • Risk & Control Frameworks • Cybersecurity Partnerships • Cloud-Enabled Platforms (AWS)

Leadership: Executive Advisory • Cross-Functional Team Leadership • Talent Development • Stakeholder Alignment • Client & Partner Relationship Management • C-Suite Communication

PROFESSIONAL EXPERIENCE

Salterra Enterprises | Remote | Hourly Consulting | May 2026 - Present

IT & AI Transformation Consultant

- Solo-designed, built, and shipped the studio's production website (Next.js 16, React 19, TypeScript, Tailwind CSS) as sole author, zero to live in ~2 weeks, with continuous deployment from GitHub to Vercel, then converted it into a functioning lead-generation funnel via integrated capture, scheduling, and analytics tooling.
- Led the studio's platform migration from Next.js/Vercel to Framer, integrating Claude Code into the build pipeline to automate defect resolution and deployment, and moved all client and build management activity onto Jira for repeatable tracking.
- Built and run a self-authored automated visual regression QA system covering 17 device and orientation combinations, using real browser rendering rather than emulation, running nightly with pass/fail gating built in for pipeline integration.
- Caught and resolved a live legal and compliance exposure prior to a client launch, incorrect company name, address, and vendor contact information published on legal pages, before it caused a problem.
- Delivered a fully custom e-commerce build for a client (no off-the-shelf platform), including a working fulfillment and invoicing workflow, resulting in 44 units sold within the first two weeks of launch.
- Diagnosed and resolved cross-device animation and rendering inconsistencies across breakpoints, including a documented debugging cycle on a template-based scroll and counter animation, verified through rigorous cross-device testing. Currently sole technical lead across a growing client portfolio spanning home services, executive consulting, and cleaning industries, with three new client engagements onboarding.

Verisk Analytics | Remote / Jersey City, NJ | Oct 2023 - Jul 2025

Director, Enterprise Transformation & Strategy, Life Solutions Platform

- Owned strategy and delivery for a client-facing SaaS platform serving life insurance carriers.
- Owned an \$8.6M multi-year transformation portfolio supporting \$5B+ in managed assets across Verisk's Life Solutions platform, reporting directly to executive stakeholders on delivery, financial, and client-impact performance.
- Cut release and upgrade cycle times by 30-40% by redesigning the enterprise delivery operating model around SAFe and Kanban, eliminating chronic delays that had eroded client and stakeholder confidence over multiple years.
- Drove 15%+ YoY revenue growth by redesigning enterprise processes, strengthening portfolio governance, and reallocating investment toward the highest-ROI client-impact initiatives.
- Stood up standardized portfolio management practices, forecasting frameworks, delivery dashboards, and financial visibility tools, that gave executives clean insight into program performance for the first time.
- Translated executive vision into executable roadmaps across product, engineering, and client-facing functions, serving as the senior advisor bridging strategy and delivery reality.

Jahnel Group | Remote / Schenectady, NY | Jul 2021 - Jul 2023

Principal Consultant, Business & Technology Transformation

- Advised insurance and financial services clients on operational, cloud, and regulatory transformation.
- Delivered SOC 1 and SOC 2 certifications up to six months ahead of schedule through disciplined delivery governance, pre-emptive control design, and tight cross-functional coordination.
- Reduced loan processing cycle time by over 100% by redesigning end-to-end workflows, automating manual steps, and integrating AWS-based cloud solutions into the client's servicing stack.
- Partnered with C-suite leaders to define transformation roadmaps balancing innovation, regulatory compliance, and profitability, serving as the translation layer between executive strategy and delivery execution.
- Led Agile, operational excellence, and cloud transformation initiatives across multiple concurrent client engagements, managing consultants and client-side staff in matrixed arrangements.

First Citizens BancShares | Raleigh, NC | May 2019 - Jul 2021

Enterprise Transformation Lead

- Led enterprise modernization across the bank's retail branch network.
- Handpicked by executive leadership to lead enterprise teller-system modernization impacting 500+ branches and 3,000+ employees, the highest-visibility operational transformation in the retail bank at the time.

- Delivered SOC 1 and SOC 2 certifications three months ahead of schedule, strengthening operational controls and executive confidence ahead of regulatory review windows.
- Increased delivery velocity and reduced rework by 30% through Agile transformation across cross-functional teams, improving predictability for executive-level planning and budgeting.
- Directed end-to-end process redesign and platform modernization, improving operational resilience, teller onboarding speed, and branch-level efficiency across the entire network.

Webster Bank | Waterbury, CT | 2016 - 2019

Vice President, Business Relationship

- Served as VP-level strategic liaison between enterprise IT and Marketing, Bank Operations, and Human Resources, owning cross-functional alignment and executive communication through a major cloud and Agile transformation.
- Led strategy and execution for migration to Amazon Web Services (AWS), coordinating across technical and business stakeholders through a multi-year platform transition.
- Drove adoption of Agile and DevOps practices across delivery teams, materially reducing time to market for new products and services.
- Managed vendor relationships and cross-functional alignment across modernization workstreams, bridging the business relationship layer between internal teams and external technology partners.

Kforce, Inc. (Client: United Technologies Corp.) | Shelton, CT | 2015 - 2019

Senior Project Manager

- Scoped, defined, and led data conversions and integrations from legacy HR systems into a global Workday deployment, coordinating across HRIS, Payroll, and HRIT functions for a Fortune 50 manufacturer.
- Sunset a 17-year-old system-of-record blocking global HR self-service rollout, clearing the path for enterprise-wide adoption.
- Served as sole administrator of Microsoft Project Server across three functions; mentored the PM community in effort-based planning and forecasting discipline.

Apex Systems (Clients: Wolters Kluwer, Travelers) | East Hartford, CT | 2013 - 2015

Senior Project Manager

- Travelers Personal Insurance PMO: Unblocked an 18-month-stalled compliance effort and delivered a multi-year paper-overhead reduction program projected at \$1.7M annual perpetual savings.
- Wolters Kluwer Corporate Legal Services: Led multiple client-facing platform efforts helping enterprise clients price and execute legal matters more effectively.

ESPN | Bristol, CT | 2012

Project Manager / Scrum Master, Technology PMO

- Re-engineered a dysfunctional ad-sales automation team into a high-performing Scrum team by unifying IT and Account Executive resources under a single delivery cadence, an early example of the organizational trust-building and change management capability that has defined every transformation role since.
- Oversaw multi-year ad-sales process automation and data-warehousing upgrade projects for senior leadership.

Travelers | Hartford, CT | 2005 - 2012

Project Manager / Project Lead / Developer / Business Analyst

- Selected into the Travelers IT Leadership Development Program, ranked in the top 30% of a cohort drawn from 3,000+ applicants (10-15 accepted), rotating through developer, BA, project lead, and PM seats on mission-critical systems.
- Led a \$4M upgrade from a 30-year-old legacy system to a modern .NET agent-appointment platform, cutting independent-agent appointment time from 10 days to 1 hour; resulting P&L generated multi-million-dollar revenue uplift.
- Managed \$4M budget and multi-line scope across Agency Administration Workstation and Just-In-Time appointing initiatives spanning Business and Personal Insurance platforms.
- Realized \$1M annual savings through desktop virtualization rollout; chaired the Leadership Development Intern Program, designing programming and mentoring early-career talent across the organization.

EDUCATION

Marist College, Poughkeepsie, NY, M.S. Information Systems (GPA 3.92) • B.S. Information Systems (GPA 3.25)
